CITY OF TORONTO STAFF BRIEFING

Green P into affordable housing.

A short internal deck to help colleagues get on side.

Heal House is asking the City to support a pathway for the Green P parcel to become part of a broader affordable housing and community-wellness solution, delivered with a non-profit partner and clear public-benefit protections.

THE OPPORTUNITY

A parking parcel can unlock a deeper civic outcome.

The Green P lands sit inside a larger Lakeshore opportunity. On their own, they serve a narrow civic function. As part of the Heal House assembly, they can become affordable housing, wellness infrastructure, and a permanent neighbourhood benefit.

Today: limited use as a standalone municipal parcel.

Unlocked: part of a complete site plan with housing and services.

Outcome: public land value converted into visible community benefit.

OPTION ONE

01

Build the two corner lots

Heal House proceeds on the two corner parcels only. This is the baseline path, but it leaves the Green P public-benefit opportunity largely unrealized.

OPTION TWO

02

Corner lot + Green P + one lot

A City-supported Green P pathway creates a stronger housing plan, a better neighbourhood edge, and a clearer public-benefit story.

OPTION THREE · PREFERRED

03

THE PROPOSAL

Heal House secures Green P. The City secures affordable housing outcomes.

This is a public-benefit proposal. The Green P transfer, sale, or land-swap-equivalent should be structured around the affordable housing outcome Toronto wants delivered — with Heal House assembling the site and a non-profit partner stewarding affordability.

HOUSING-FIRST FRAMING | GREEN P PATHWAY | NON-PROFIT DELIVERY | CITY PUBLIC BENEFIT

WHY IT FITS TORONTO

The City gets mission-aligned housing without becoming the developer.

Toronto priorities

More affordable homes, public land value converted into public benefit, and community-serving uses at grade.

Heal House role

Lead the site vision, coordinate the land pathway, and partner with a non-profit to deliver affordability.

A land swap in spirit: public land value exchanged for affordable housing delivery.

> The City can treat Green P as a public-benefit lever. Rather than viewing the parcel only as a parking asset, staff can frame it as a contribution toward affordable housing, wellness services, and a stronger complete-community outcome.

City

Defines the land pathway and public-benefit conditions.

Heal House

Secures the parcel and integrates it into the complete-site plan.

Non-profit

Delivers and stewards the affordable housing commitment.

COMPLETE-SITE MASSING DIRECTION

Possible safeguards

Affordable housing covenant registered against the project.

Non-profit role documented in the delivery structure.

Public-benefit reporting back to the City.

Milestones tied to planning and delivery progress.

What this avoids

No City operating burden.

No complicated ownership partnership.

No unnecessary complexity in the first conversation.

No dilution of the core public outcome.

THE SHORT STORY

Toronto can turn a parking parcel into affordable housing by letting Heal House secure Green P, integrate it into the complete site, and deliver affordability through a non-profit partner.

A staff-aligned case for supporting the Green P pathway.

This deck is designed for City staff to circulate internally: a concise rationale for why the Green P parcel should be made available to Heal House as part of a broader affordable housing and community-benefit solution.

1

Review options

Compare the two-corner-lot baseline, the Green P pathway, and the full-block vision.

2

Confirm pathway

Identify the City process for Green P disposition or land exchange.

3

Build support

Equip colleagues with a clear public-benefit rationale to support the transfer.
